Dear STIC,	
Please search the	multiple sequence search request set forth below.
Thanks,	
Mike Pak	
Sent: Su To: Pa Subject: sec	nnifield, Nita nday, April 30, 2006 3:29 PM k, Michael quence search approval 08/170344
Michael, 08/170344	
Michael,	
revived and claims. I nee	s been ABN since 01/97; however Applicants petitioned to have it of course it was revived. There are 74 short peptide sequences in the d an interference sequence search done. Please approve so I can get this (this is a 2 month amdt. case).
STIC	

Please do an interference sequence search on SEQ ID NO: 1-74 (all aa sequences) of this application.

Please provide a paper copy of all results.

Thanks, Minnifield,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                9
    Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  score:

Sequence 10, Application US/09359382

Patent NO. 6306397

GENERAL INFORMATION:
APPLICANT: EDWARDS, Stirling John
APPLICANT: COX, John Cooper
APPLICANT: WEBB, Elizabeth Ann
APPLICANT: FRAZER, Isn
APPLICANT: FRAZER, Isn
TITLE OF INVENTION: VARIANTS OF HUMAN PAPILLOMA VIRUS ANT
FILE REFERENCE: 017227/0148
CURRENT APPLICATION NUMBER: US/09/359,382
CURRENT FILING DATE: 1999-07-23
BARLIER APPLICATION TOMBER: US 08/860,165
BARLIER FILING DATE: 1997-09-22
EARLIER FILING DATE: 1997-09-22

US-09-252-991A-22590
                                 GENERAL INFORMATION:

APPLICANT: Marc J. Rubenfield et al.

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TITLE OF INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS

FILE REFERENCE: 107196.136

CURRENT APPLICATION NUMBER: US/09/252,991A

CURRENT FILING DATE: 1999-02-18

PRIOR APPLICATION NUMBER: US 60/074,788

PRIOR APPLICATION NUMBER: US 60/094,190

PRIOR FILING DATE: 1998-07-27

NUMBER OF SEQ ID NOS: 33142
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 19511, Application US/09252991A
Patent No. 6551795

GENERAL INFORMATION:

APPLICANT: Day, Craig H.

APPLICANT: Hosken, Nancy A.

APPLICANT: Hosken, Joseph M.

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR THE DIAGNOSIS AND TITLE OF INVENTION: TREATMENT OF HERPES SIMPLEX VIRUS INFECTION FILE REFERENCE: 210121.538C3

CURRENT APPLICATION UNMBER: US/10/237,551

CURRENT FILING DATE: 2002-09-06

NUMBER OF SEQ ID NOS: 254

SOFTWARE: FRStSEQ for Windows Version 4.0

SEQ ID NO 215

LENCTH: 547

TYPE: PRT

ORGANISM: Herpes Simplex Virus Type 2

                                                                                                                                                                                                                                                                             US-09-949-016-9511
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ORGANISM: Herpes Simplex Virus Type 2 US-10-237-551-216
                                                                                                                                                                                                                                                                                                     RESULT 46
Sequence 9511, Application US/09949016

Patent No. 6812339

Patent No. 6812339

Patent No. 6812339

PAPPLICANTION:

APPLICANT: VENTER, J. Craig et al.

APPLICANT: VENTER, J. Craig et al.

TITLE OF INVENTION: POLYMORPHISMS IN KNOWN GENES ASSOCIATED

TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND USES THEREOF

FILE REFERENCE: CL001307

CURRENT APPLICATION NUMBER: US/09/949,016

CURRENT FILING DATE: 2000-04-14

PRIOR APPLICATION NUMBER: 60/241,755

PRIOR APPLICATION NUMBER: 60/237,768

Rubenfield et al.
TITLE OF INVENTION: NUCLEIC ACID AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OF INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
FILE REFERENCE: 107196.136
CURRENT APPLICATION NUMBER: US/09/252,991A
CURRENT FILING DATE: 1999-02-18
PRIOR APPLICATION NUMBER: US 60/074,788
PRIOR FILING DATE: 1998-02-18
PRIOR FILING DATE: 1998-02-18
PRIOR FILING DATE: 1998-02-18
PRIOR FILING DATE: 1998-07-27
NUMBER OF SEQ ID NOS: 33142
SEQ ID NO 21575
LENGTH: 740
TYPE: PRT
                                                                                       Sequence 5208, Application US/09328352
Patent No. 6562958
GENERAL INFORMATION:
APPLICANT: GATY L. Breton et al.
TITLE OF INVENTION: MUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO ACINETOBACTER
TITLE OF INVENTION: BAUMANNII FOR DIAGNOSTICS AND THERAPEUTICS
FILE REFERENCE: GTC99-03PA

   Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                    Score
